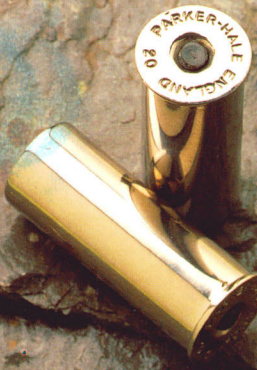
Quality Shooting Accessories

SINCE 1880



PARKER·HALE

Everything for shooting

"Guns which have been correctly cleaned and maintained will give years of lasting satisfaction. Guns which never see a drop of oil or a cleaning rod are not only dangerous to the user, but also a potential hazard to fellow sportsmen.

You wouldn't drive your car without oil in the engine, and in the same way you shouldn't contemplate firing a shotgun, rifle or pistol without checking that it is in serviceable condition.

All firearms respond to care and attention. Today, there is no excuse for not maintaining a gun's performance and condition. After a day in the field or on the range, one of your first priorities is to check and clean your gun before you look after your own personal comforts.

Guns are constructed to exacting tolerances. By making sure all the parts are clean and correctly lubricated, your gun will give you years of lasting pleasure."

Roger Hale

Roger Hale

A good cleaning kit is essential. Parker-Hale have one of the most comprehensive arrays of gun care products available, ranging from oils to luxury boxed cleaning kits with everything you need to keep your gun in pristine condition.

Parker-Hale has an unmatched pedigree with over a century of experience, innovation, service and supply to the sport. The brand is synonymous with quality and durability and Parker-Hale cleaning accessories are found in gun rooms all around the world.

Rifle Cleaning

"Express" Rifle Set

Calibre: .22 to .600

Contains – three piece brass ball bearing handled rod: Young's '303' cleaner and rust preventer, Rangoon oil, nickel plated brass oil bottles, turnscrews and rod attachments in a fitted mahogany presentation box.

Ref: ERS *(state calibre)*

"Safari" Rifle Kit

Calibre: .22 to .600

Contains – 3 piece brass ball bearing handled rod, Young's '303' cleaner and rust preventer, Express oil, cut patches, jag, mop, phosphor bronze brush and cleaning cloth, in a very tough moulded plastic box with detachable lid/tray.

Ref: SO2/SO3 *(state calibre)*

Cleaning Rods

One-Piece Rods

All one-piece rifle rods feature a special hardened and tempered steel core, ball bearing handles, brass fittings and a tough acetate protective covering to prevent barrel wear. Three core sizes are available for .17 calibre, .22 to 6.5mm and .270 calibre upwards. Rod handles are colour coded – red for the smaller calibres, black for the larger. Please consult the brush packs to ensure correct fitments.

Ref	Calibre	Effective length
17AL	.17	32" (81cms)
22A	.22 to 6.5mm	32" (81cms)
22AL	.22 to 6.5mm	37" (94cms)
22ALX	.22 to 6.5mm	44" (112cms)
27AL	.270 upwards	37" (94cms)
27ALX	.270 upwards	44" (112cms)

Note: In USA rods may be offered with an adaptor to convert the Parker-Hale thread to accept most US-made brushes.
Ref: OH22/OH30/OHSG

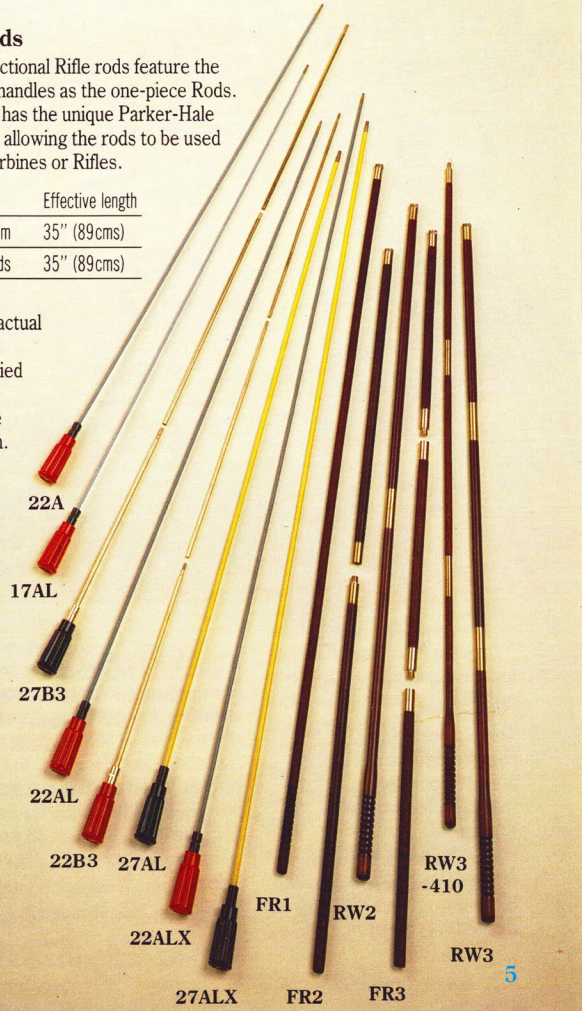
Rod extensions are also available (RE22 for .22 calibre – RE30 for .270 calibre upwards) to increase the rod length by 2¾" (7cms).

Sectional Rods

All three piece Sectional Rifle rods feature the same ballbearing handles as the one-piece Rods. Each Rod section has the unique Parker-Hale implement thread allowing the rods to be used for Handguns, Carbines or Rifles.

Ref	Calibre	Effective length
22B3	.22 to 6.5mm	35" (89cms)
27B3	.270 upwards	35" (89cms)

Always state the actual calibre required. Each Rod is supplied with a jag or loop cleaner to suit the calibre in question.



Shotgun Cleaning

The 'London' Set
Two-piece rod, patches, oil bottle, three London pattern turnscrews, jag, phosphor bronze brush, mop, extractor, snap caps, Young's '303' and polishing cloth.
Size: 18¼" x 8⅞" x 3"
Available in 12, 16 or 20 gauge
Ref: LDS

The 'Gunroom' Set
A deluxe outfit for either one or two different shotgun gauges. Two-piece rod, oil bottles, jags, phosphor bronze brushes, mops, packets of patches, bristle brush, Young's '303', Rangoon oil and cloth.
Size: 18¼" x 8⅞" x 3"
Available in 12, 16 or 20 gauge or any combination of two gauges.
Ref: GRS

The 'Presentation No. 1' set
Three-piece rod with brass fittings, split brass jag, phosphor bronze brush, bristle brush, wool mop, Young's '303', Rangoon oil and polishing cloth.
Size:
12¾" x 9½" x 2½"
Available in 12, 16, 20 or 28 gauge.
Ref: PS1

The 'Presentation No. 2' set
Three-piece rod, jag, phosphor bronze and bristle brush, mop, oil bottle, plated snap caps, hook extractor and Young's '303'.
Size: 12½" x 8¼" x 3"
Available in 12, 16 or 20 gauge.
Ref: PS2.

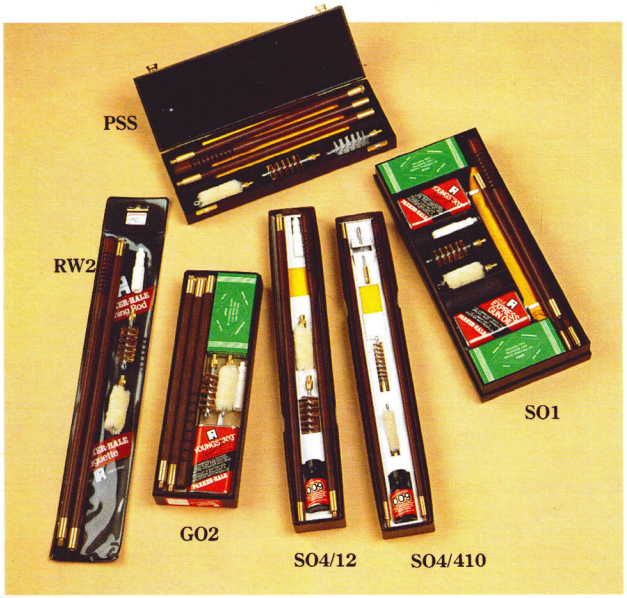
The 'Mixte' Set
Suitable for most shotguns, combination guns and rifles. Two-piece shotgun rod, three-piece rifle rod, two oil bottles, jags, phosphor bronze and bristle brushes, mops, Young's '303', patches, Rangoon oil and cloth.
Size: 12¼" x 11" x 3"
Available in 12, 16, 20 or 28 gauge combined with one of .22, .24, .27, .30, .37 or .45 calibre.
Ref: MXS

The 'Classic' set
Boxed in black leatherette case. Three-piece rod, phosphor bronze brush, bristle brush, wool mop and polishing cloth.
Size: 12⅜" x 4¼" x 2"
Available in 12, 16 or 20 gauge.
Ref: PSS

The 'Safari' kit
Three-piece hardwood rod, Young's '303', oil, patches, brushes, jag and cleaning cloth in an extra tough moulded case with detachable lid which also serves as a tray.
Ref: SO1 in 12, 16, 20, 28 or .410 gauge.

The 'Handy' kit
Compact kit in a tough card box with three-piece rod.
Ref: GO2 in 12, 16 or 20 gauge.

The 'Shotgun S04' kit
Best selling cleaning set with two-piece swell-handle rod, fittings, duster and 15ml bottle of '009'.
Ref: SO4 in 12, 16, 20, 28 or .410 gauge.



The Rods...
Top quality hardwood rods, turned with swell handles for easy grip and fitted with solid brass cross-riveted joints. Supplied with a moulded nylon jag in 12, 16 or 20 gauge and with a loop cleaner in 28 and .410 gauge.

The **'RW2'** rod set is supplied in a wallet with jag or loop, phosphor bronze brush and wool mop.
Ref: RW2 in 12, 16, 20, 28 or .410 gauge
Length: 34" (86 cms). Sections: 17" (43 cms)
Ref: RW3 (rod only + jag) in 12, 16, 20, 28 or .410 gauge.
Length: 34" (86 cms). Sections: 11½" (29 cms)

'Fieldsman' rods have grooved handle ends and are available in two or three piece form, with a nylon jag in 12, 16 or 20 gauge.
Lengths as RW rods.
Ref: FR2
Ref: FR3 in 12, 16 or 20 gauge

One-piece **'Fieldsman'** rod in hardwood with brass fitting.
Length 37" (94 cm)
Ref: FR1 in 12, 16 or 20 gauge.

For illustrations see page 5.

Handgun Cleaning

The Kits...

The 'Safari' Handgun Kit

Top quality kit with ball-bearing handled rod, and full complement of brushes, jag patches and cleaning cloth, in a super-strong compartment case with tray lid.

Ref: PO1 in .22, .25, .32, .38 (9mm), .40 (10mm) and .44/.45

The 'PCS' Pistol Kit

Packed in a durable plastic box with hinged lid and containing a strong acetate covered rod, Young's '303' cleaner and rust preventer, jag, phosphor bronze brush and cut patches. Available in .22, .25, .32, .38 (9mm), .44/.45 calibres

Ref: PCS *state calibre required.*

The Rods...

Ball bearing handled, acetate covered Rods with brass fittings for all calibres from .22 to .45. Packed in a durable plastic wallet with colour coded handles as for rifle rods.

Type	Calibre
Ref: PBH1	.22
Ref: PBH2	.32
Ref: PBH3	.38 (9mm)
Ref: PBH4	.45

The PRS Rod Sets

As illustrated above, carded with jag and phosphor bronze brush.

Type	Calibre
Ref: PRS1	.22
Ref: PRS2	.32
Ref: PRS3	.38 (9mm)
Ref: PRS4	.44/.45

Brushes Mops, Jags

Parker-Hale brushes, mops and jags are the finest cleaning attachments made today, available in a wide variety of top quality materials and threaded to fit Parker-Hale rods. Most attachments are individually blister packed. Pistol rods and sectional rods are packed in a plastic wallet complete with jag or loop cleaner. Rifle and pistol rod handles are colour coded for ease of identification.

Red – .17 to 6.5 mm calibre
Black – .270 calibre upwards

Phosphor Bronze Brushes

Phosphor bronze brushes made with military specification phosphor bronze filament. Larger calibres have oval core wires for strength and durability.
Phosphor bronze brushes are made in 16 different calibres or gauges from .17 to 8 bore. There is also a special short revolver brush .38 calibre RV6, which will clear the frame aperture of .38/.357 calibre revolvers to avoid crushing the bristles. The very flexible wool mops, bristle brushes and nylon brushes do not require such fine graduation.
Choose the size nearest to the calibre required. Eg: for .44 magnum – **WM40.**

Brushes, mops and jags are coded by calibre or bore size. Eg:

Ref: PB22 = Phosphor Bronze .22 calibre
WM30 = Wool Mop .30 calibre
BB12 = Bristle Brush 12 gauge
NB40 = Nylon Brush .40 calibre

Wool mops – for oiling after cleaning.
It is advisable to wash mops and bristle brushes from time to time with detergent.

Jags and Swabholders

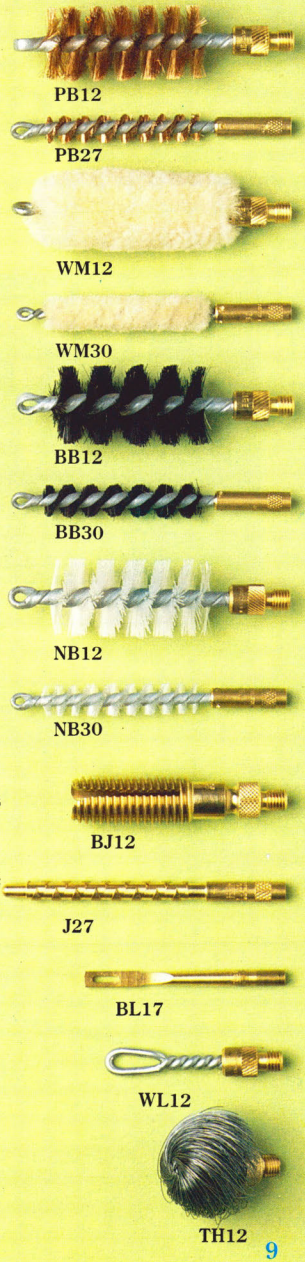
There are three styles of jag or swab holder.
a) 'Diamond' jags for rifle and handgun
b) loop cleaners, and
c) split brass or nylon jags for smooth bore guns

'Diamond' jags hold cloth patches firmly and are the most efficient swab holders. Loop cleaners are easy to use for quick swabbing. Smooth bore jags are split to provide flexibility when cleaning choked barrels.

Ref: NJ = Nylon Jag
BJ = Brass Jag
BL = Brass Loop
J30 = .30 calibre 'Diamond' Jag

Turks Head Cleaners

A traditional pattern of cleaner for shifting stubborn leading or plastic deposits in smooth bore barrels. Steel wires are curled in to keep ends from scratching. Use with care!



Cleaning hints & tips

The time to clean a gun is right after you have finished shooting and before it is put away. Lead, gilding metal, plastic and powder residues build up in the barrel and action mechanism every time you shoot, and, unless cleaned thoroughly, corrosion and wear will set in.

1. Use a phosphor bronze brush and Young's '303' to scrub out the barrel. Phosphor bronze will not scratch the steel but scours the rifling and will shift all but the most stubborn fouling. Parker-Hale wire brushes are made to exacting standards, to suit all popular calibres and will out-last other brands if treated well. Always choose the size of brush to suit your barrel and push it right through so that the bristles flex naturally. If you scrub them back and forth inside the barrel the bristles become crushed, shortening their useful life and reducing efficiency.

2. Next, wrap a flannelette patch diagonally round the jag supplied with each cleaning rod and swab out the barrel, changing patches until they come out clean. DO NOT push the jag right out of the barrel as it will then tend to bunch up or unwrap and, although a bare brass jag will not damage the barrel, you will have to refit the patch.
3. Finally, apply a generous coating of Young's '303' or Rangoon oil on a wool mop or hogs bristle or nylon brush to preserve the clean steel from corrosion.
4. BEFORE SHOOTING, dry out the barrel with a clean patch.
5. Shotgun jags are available in brass or moulded nylon. The patch should be fitted round or slotted into the jag. Wool mops should be kept clean by occasionally washing with detergent to remove particles of lead or other fouling. After washing, they may be bathed in Young's '303' instead of drying out, if preferred.

Full instructions for use of Parker-Hale chemical products are given on the containers. Brushes, mops and jags come on a blister card printed on the reverse with a guide to rod fitting.

Young's '303'

Young's '303' dates back to the turn of the century, when it was developed by the chemist and rifleman Stephen Young for sterilisation and preservation of surgical instruments. Found to be even more effective for cleaning and preserving rifle and gun barrels, its distinctive aroma permeates gun rooms and armouries around the world.

Young's '303' Cleaner and Rust Preventer

The best known and most widely used emulsifying cleaner and rust preventer for gun and rifle barrels and external protection of metal parts. Not a lubricant, it should not be used in the lock mechanism, but is amongst the best cleaners for dissolving powder deposits and will keep barrels free from rust for an indefinite period. Young's '303' Cleaner and Rust Preventer forms an airtight film on metal surfaces and should not be used for lubrication. It can, however, be mixed with water (1 part Young's to 3 of water) as a more economical cleaner with better powder-dissolving properties, especially useful for swabbing out black powder guns. (Young's Black Powder Solvent is an alternative preparation for muzzle loaders.) Available in the following containers.

Ref: D11	Aerosol 5ozs
Ref: 193T	125ml tin
Ref: 193A	250ml tin
Ref: 194	500ml tin
Ref: 195	1 Litre tin
Ref: 195A	5 Litre container

Bulk packs available on request.

Young's Black Powder Solvent

Mixed with water as an economical cleaner to remove black powder fouling quickly, leaving the bore free from corrosive deposits. May be used neat as a rust preventer.

Ref: YBP2	250ml tin

Oils & Chemical Products

'Comet' Gun Blue
A powerful cold liquid gun blue for retouching steel.
Ref: CBG4 2oz bottle

Gun Degreaser Spray
Essential preparation for retouching work with 'Comet' gun blue or general cleaning.
Ref: GD1 150 ml spray

Fabric Waterproofer
Equally effective on leather.
Ref: FW1 300 ml spray
All spray packs are CFC free.

'009' Nitro Powder Solvent
A powerful cleaner which dissolves powder residues and lead or gilding metal deposits in barrels. Use as a rust preventer after cleaning.
(See pack for full instructions)
Ref: 009-10 100ml glass bottles

'Express' Lubricating Oil
A light mineral oil for all moving parts of guns, rifles or pistols. Contains a special rust inhibitor.
Ref: LO5 5oz Aerosol
Ref: LO4 125ml tin
(Bulk containers available on request.)

'Rangoon' oil
An old favourite for the protection of all steel surfaces, forms an air-tight film which is not easily removed by contact. Excellent for long term storage.
Unlike Young's '303', Rangoon oil is not soluble.
Ref: 500 125ml

Cleaning Patches & Pull-through Cleaners

Pull-throughs for rifles and shotguns
Compact, user-friendly and economical cleaners in a plastic wallet, made from top quality cord with solid brass weight and a variety of brush types.

Type	Calibre	.22	.270	.40 up
Hogs bristle brush	Ref:	PTB2	PTB3	PTB4
Phosphor bronze brush	Ref:	PTW2	PTW3	PTW4

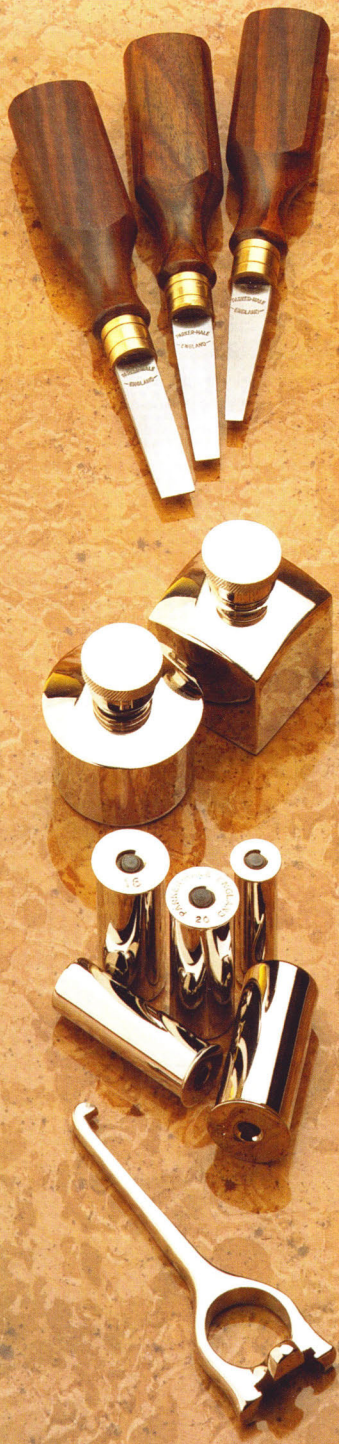
Flanelette cut patches and 'Forbytoo' rolls
Absorbent flannelette cut patches in three sizes for rifles and handguns. Packed in card dispensers, 12 per master carton.

Ref	Calibre	Pack size
F1	.22 to 6.5mm	75 approx
F2	.270 to .38 pistol	45 approx
F3	.30 up rifle	45 approx

Shotgun patches – a coarse weave, absorbent cotton in dispenser packs of 25 patches, master carton of 12.
Ref 155B: for gauges 28, 20, 26 and 12.

Flannelette rolls, economical 'Forbytoo' in rolls 4" wide, red stripe every 2".
Ref: 187B 50 yard roll (approx)
Ref: 187C 6 yard roll (approx)

English made Presentation Accessories



London Pattern Turnscrews

Set of three best quality gunsmiths turnscrews, flat ground with hardened blades, brass ferrules and rosewood handles – length 6¼" approx.
Ref: 6e
Also available in a presentation box, **Ref: 6eB**

Square or Round Oil Bottles

In heavy nickel plated brass, 1½" square or 1½" diameter with leak proof screw top fitted with feather.
Ref: (square) 2b
Ref: (round) 2a

Nickel Plated Brass Snap Caps

Best quality English traditional snap caps with adjustable spring loaded cap, supplied in pairs and available in 12, 16, 20, 28 or .410 gauge.
Ref: No.3 *(state gauge)*

Hook Extractors

In solid brass, polished and heavily nickel plated in 12, 16 or 20 gauge.
Ref: No.11 *(state gauge)*
